

Uncapped Art References

Table of Contents

MetalSkinPanic Arm 1

- Punched/pressed steel plating
- Reduce chassis weight
- Reduce load on articulation motors
- Better cooling of motors
- Allows for bolts & fasteners to be placed in other configs for different loadouts

Plating Reference

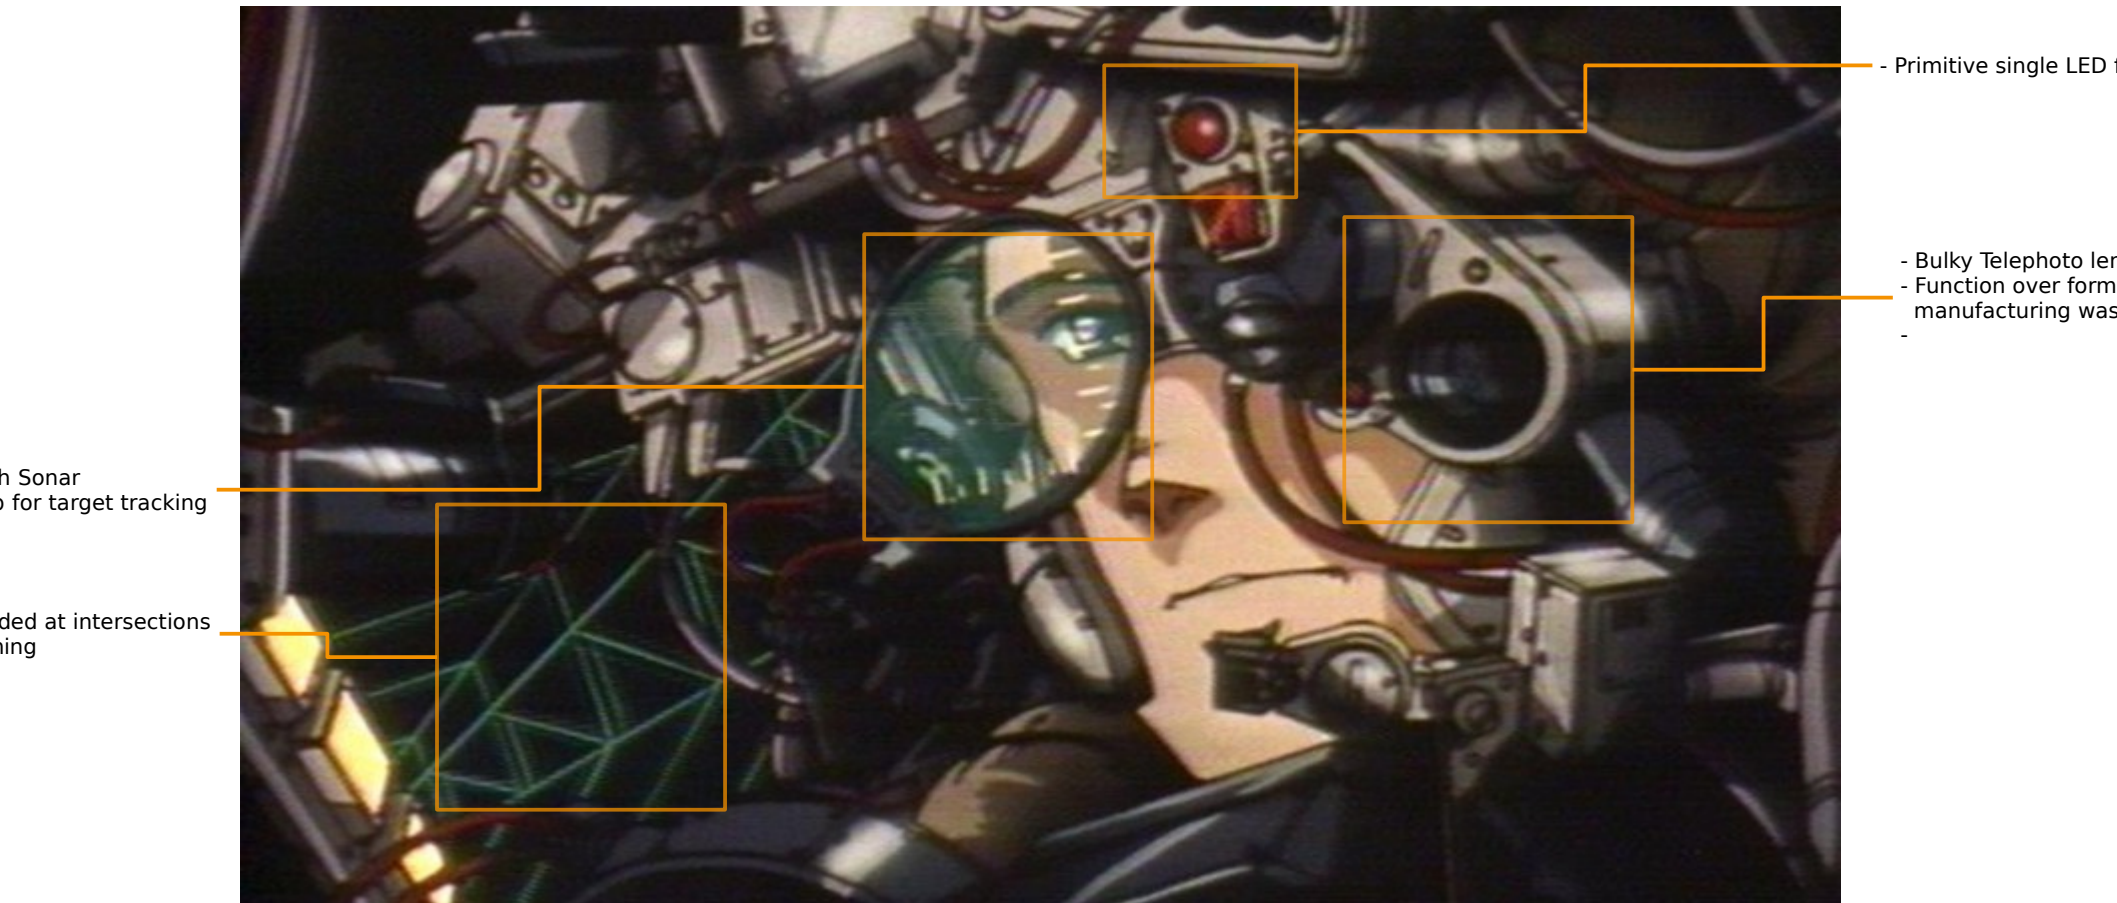

- Hydraulic lines for articulation
- Oil lines/grease ports at joints

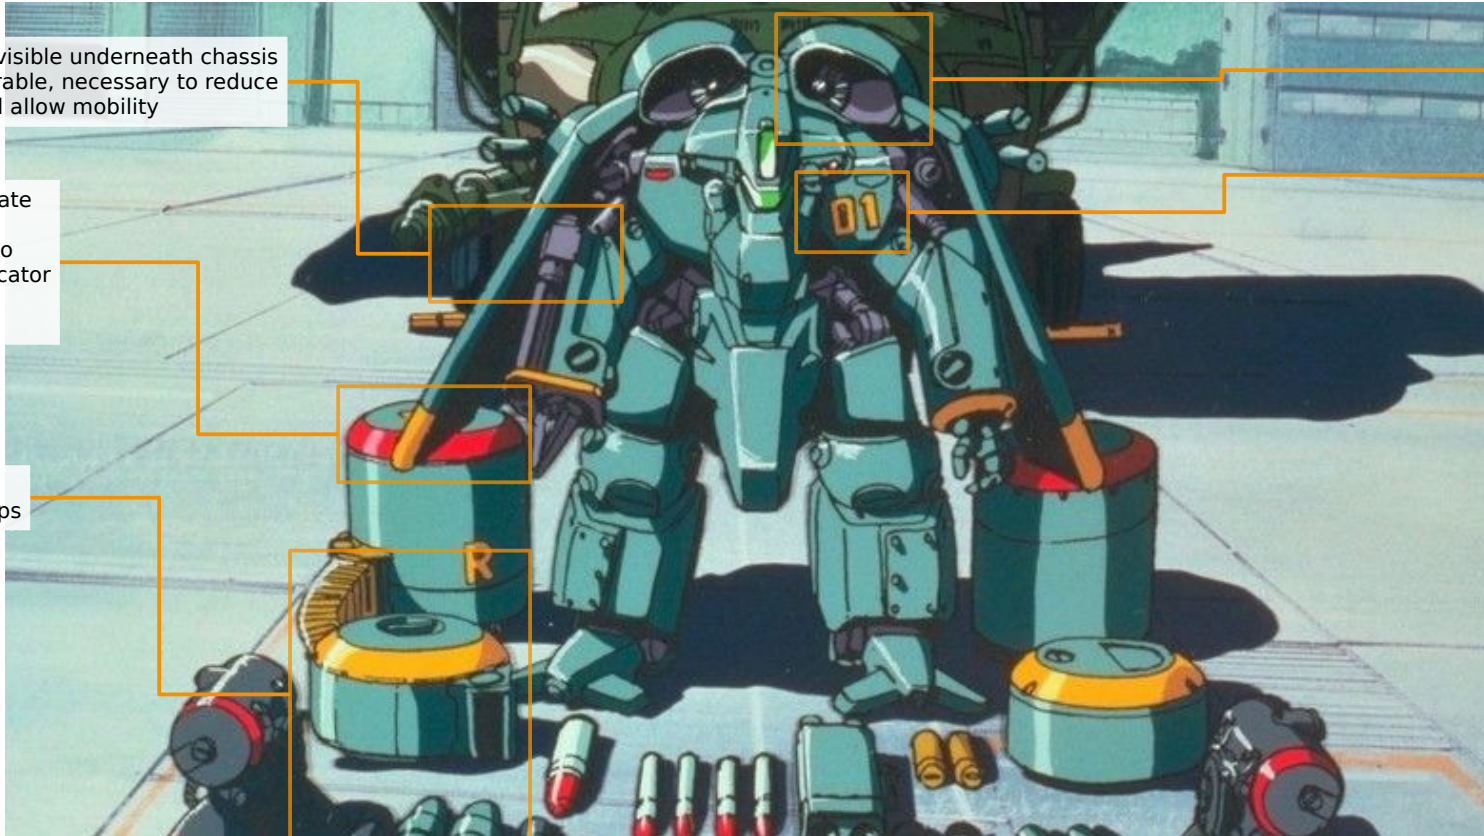

- Flush Rivet fasteners
- Primitive shapes
- Complex parts are multiple primitives fastened together
- No CNC machined parts, only cut, formed, cold roll
- Wrist articulates in one axis

- Hydraulic pumps for articulation
- Expensive/easy breakdown requires armor plating

MetalSkinPanic Arm HUD

MetalSkinPanic Maddox Suit

- Internal framing visible underneath chassis
- Hydraulics vulnerable, necessary to reduce frame weight and allow mobility

- Red/Orange paint to indicate warnings
- "This Side UP" on ammo
- Wing tips as visual indicator to prevent collisions
- Back blast zone

- Belt Fed ammunition
- Basic Cylinder with radius caps

- Premium/Enterprise grade
- Ballistics deflection
- Show of power/wealth
- Brushed/Blued steel armor

- Painted insignia, serial no., company affiliation
